

Anal sac gland carcinoma in Spaniels

Blood Sample Submission Form

Please submit samples to:

Dr David Sargan
Dept of Veterinary Medicine
Maddingley Rd
Cambridge CB3 0ES
drs20@cam.ac.uk Tel: 01223 337686

UNIVERSITY OF CAMBRIDGE

Department of Veterinary Medicine

We are beginning an investigation the genetic causes of predisposition of spaniels to anal sac gland carcinoma. For this we are collecting blood samples from anal sac gland carcinoma affected animals of all spaniel breeds and from cancer free spaniels more than 9 years old.. (Note that these blood samples should be residues remaining from blood taken for other clinical purposes benefiting the patient, and should only be sent after informed consent has been obtained from the dog's owner).

Please send clinical excess blood samples (up to 2ml) in EDTA tubes to Dr Sargan at the address above.

Name and address of veterinarian contributing sample:

.....

Date

Spaniel Breed (please circle or name): Cocker English Springer American Cocker
Cavalier King Charles

Other

Pet Name of Dog

.....

.....

Kennel club registration number / name if available.
